Surface Glide Technology™
Grooved Grating Surface

Secure grip for safety

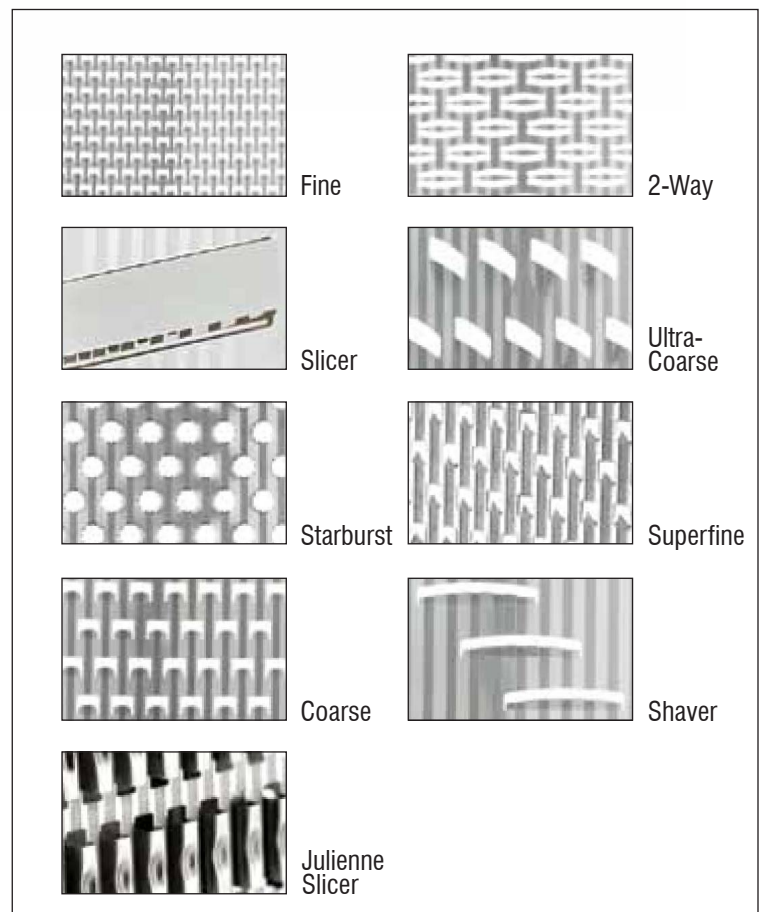

Protective cover doubles
as measuring device

Surface Glide Technology™ Graters

Exclusive to Cuisipro, Surface Glide Technology™ grooved grating surface takes etched graters to the next level. Surface Glide Technology™ graters create the perfect balance between ease of grating and maximum efficiency for the ultimate grating experience that etched graters alone cannot compete with.

The science behind this new technology is based on the repeated grooved pattern that is spread evenly across the face of the grating surface. First, the groove reduces resistance, making grating effortless. Second, the groove elongates the length of each individual blade, so it has a larger cutter surface that comes in contact with food, therefore grating more with less effort.

Combined, these features create a perfect surface for outstanding uninterrupted grating performance where food virtually glides through the blades.
